Project Reflection Report

Sri Cafe

1.Project Title: Sri Cafe – Responsive Online Cafe Website

2.Intern Name: Akula Sripriya

3.College: YJRDMS College of Engineering, JNTUK

4.Duration: two days

5.Objective: To design and develop a responsive and user-friendly website for a cafe, allowing customers to view menu items, place orders, and contact the cafe easily.

6.Technologies Used: Bootstrap, HTML, CSS, JavaScript.

7.Project Description:

- The “Sri Cafe” website is a responsive and visually appealing web application designed to simulate a real cafe experience online.
- The website includes three main sections: Home, About, and Contact.
- The Home page showcases all cafe items neatly arranged with an option to place an order.
- The About page highlights the cafe’s story and specialties.
- The Contact page displays essential cafe details such as location, timings, and contact information.
- The order and feedback forms are designed to send user details directly to the provided email address.

₹70

→About:

Sri Cafe

HomeAboutContact

About Sri Cafe

A place where every sip and bite brings comfort, joy, and connection.

A close-up photograph of a dark-colored coffee cup with a white latte art design of a swan. Steam is rising from the cup, and coffee beans are scattered around the base. The cup has 'SRI CAFE' written on it.

Our Story

Sri Cafe began with a simple dream — to create a cozy space where people can relax, connect, and enjoy freshly brewed coffee, delicious desserts, and warm smiles.

Every cup at Sri Cafe is crafted with love and care using the finest ingredients. Whether you're here for a quick coffee break or a long chat with friends, we promise a delightful experience every time.

Why Choose Us?

- Freshly brewed coffee made with passion
- Homemade desserts and tasty snacks
- Calm and cozy environment
- Friendly staff and warm service

8.Role and Responsibilities:

- Worked as a beginner handling the complete design, layout, and functionality of the website.
- Designed responsive navigation bars and integrated order-placing and contact forms.
- Implemented inter-page linking and enhanced user interaction using JavaScript.

9.Challenges Faced:

- Implementing smooth redirection between pages without disturbing layout consistency.
- Ensuring form data submission and debugging email sending issues.

- Making the interface responsive and attractive across different devices.

10.Learning Outcomes:

- Improved knowledge of HTML, CSS, and Bootstrap for responsive design.
- Gained practical experience in integrating form handling through web methods.
- Strengthened problem-solving and debugging skills while developing a live-style project.

11.Future Enhancements:

- Connect the order system to a real database for dynamic item management.
- Add an admin dashboard for order tracking and user feedback analysis.
- Enhance security for form submissions and user data handling.

12.Conclusion:

The Sri Cafe project helped me understand complete website development — from designing user interfaces to handling user input.

This project gave me confidence to build full, responsive

websites independently and improved my creativity and technical problem-solving skills.
